

# Esterification of used frying oils with a high content of free fatty acids using solid resins.

*J.M. Marchetti, V.U. Miguel, A.F. Errazu*

*Planta Piloto de Ingeniería Química  
Bahía Blanca, Argentina*

- On this work we analyzed the conversion of acid oils of high FFA content employing basic solid resins.
- Study of the main variables involved on the process, such as the reaction temperature, the initial molar ratio of alcohol to oil and the amount of catalyst, the initial quantity of FFA over time.
